

..Vibrations And Tickling	1	R. It actually tickled a bit.
	2	I. How would you describe such a concrete maybe, what,
	3	that is, what you have
		been feeling right now?
..Air	4	R. So I also think... It also felt like a stream of air, but then
	5	jerked from the
..Vibrations And Tickling		bottom of the hand and then jerked until about the middle
..Vibrations And Tickling	6	of the fingers. But it
		feels like an air stream, and it started to spring, about when
	7	it hits the
..Vibrations And Tickling		fingers in front of the palm, yes. So it's so very concrete,
..Noticeable	8	then I would say,
..Noticeable		air. It did not feel vibrating or pulsating, so it was a
	9	constant, and it was
		more powerful than the second, so it was a very clear
	10	feeling that it was moving,
		and then it was a bit like one, I do not know, a wall that
..Noticeable	11	kind of moves so
		that the airflow was very clear, very specific, very flat, and
	12	then moving
..Novel Experience		upwards. Or down, it's so. So that was how concrete I felt.
..Difficulties Putting It In Words	13	But I do not quite
		know what I associate it with. It's a little hard to just put
	14	into words, I
		think. Yes.
	15	I. What is it that makes it difficult to put into words?
..Novel Experience	16	R. That, among other things, I have not really felt it before
	17	in something
..Scanning		specific, so the first thing that popped up in my head, it's
..Scanning	18	things from sci –
..Scanning		fi movies, you know where you get scanned by a laser or
	19	infrared something, you
		just know that red line that kind of runs up you. And that
	20	was what I was
..Scanning		thinking. So maybe, well, in general, what you associate
	21	with, it's like in a
..Novel Experience		movie where you put your hand on something and it just
	22	scans your fingerprints,
		and then that's it. So that's what I was thinking. And it's not
..Novel Experience	23	something you've
		tried before, so I've seen it in movies, and that's what made
..Novel Experience	24	me think of it,
		but I've not tried anything like it in reality, and that's what
	25	made it hard to
		put into words. I can not really say "hey, that's what makes
	26	me think", apart
		from this slightly airy sci – fi universe. So that, yes, it makes
	27	it a little
		hard to put into words for, I think.

28 I. Did you also use this scanning analogy when you had to
 29 describe it to someone
 30 who had not tried it before?

30 R. Depending on who it is, then yes. People I know who
 31 would know what I meant,
 32 there I would use that analogy because there would... So, I
 33 think I think it's the
 34 most descriptive. To my mother, who at least did not want
 35 to know what it was, I
 36 would probably describe it as one, that is, a stream of air
 37 that just as well
 38 moved up your hand. But I just do not think it is as
 39 descriptive. I feel that
 40 the scanning analogy is actually the one that hits best
 41 because it is a very
 42 specific place that kind of moves. It is not bigger, that is,
 43 my hand is too
 44 wide for it to be the width it is breathing on, or not
 45 breathing, but that I can
 46 feel the vibrations. So that's why I would say the scan is so
 47 very appropriate.

39 I. Yes. Cool. This scanning thing you said was the first thing
 40 that came to your
 41 mind. So, was it like that when you first felt it, or did it
 42 come a little later
 43 during...?

42 R. No, it came pretty much right away, actually. Not
 43 decidedly, it was only here
 44 when we talked about it that I came to think of a hand being
 45 placed on a plate
 46 and it scans, but the first thing I thought of was just being
 47 scanned. That is,
 48 that you see it that way, yes. I just have that picture of such
 49 a red line that
 50 kind of runs up and down to see who you are, and then
 51 that's it. So that's what
 52 I'd been thinking about almost immediately.

48 I. It makes sense in my head, at least.

49 R. Yes, I think so. But at least that was what I thought, and
 50 then it tickled.
 51 The others do not have the source. It actually tickled.

51 I. And I think you said at the beginning that it tickled most
 52 on the fingers,
 53 compared to?

53 R. From here and up. The palm does not, but like straight, I
 54 think it is when it,
 55 it was special when it hits the pieces between the fingers,

..Vibrations And Tickling

55

that then that was

where it started to spring. I do not quite know why, but it may have something

56

to do with the height is a little different, after all. So that was, yes, that

57

was where it hit. For it did not on the palm. So on the palm there was nothing,

..Mild

58

it was just this that feels a bit like a light touch. Yes.

59

I. Fat. Is there anything else you think needs to be mentioned.

60

R. No, I do not think so. Not around this one.

61

I. Super. Shall we, we just have one last one we can try?

62

R. Yes. I would like to.

63

I. Yes.
