

..Fun { 1 R. **It was fun**. It had, it was a much wider, that is, much
2 wider. It ran like up
3 from the top of the hand and looked down. But before,
4 where the breathing that
5 has been, has been very concentrated around a very small
6 area, then it runs here
7 on the whole hand, while breathing like this, it was much
8 wider than the others,
9 so **it does not feel as much like a human breath**. That's why
10 I think I've said
11 the others have been a human breath, it's like because when
12 you breathe, it
13 comes out a lot in a very, very small area, while this one, it
14 was more such a
15 mixture of **a feather** which came on the whole hand at once.
16 Yes.
17 I. So it almost felt like the whole hand was being stimulated.
18 R. Yes. It runs like that from the start and then down, but
19 much wider in like
20 that where air comes out on it. And then it was a little fun.
21 Well, **it was a**
22 **little tickling** because [indistinct, 13:26] , **I came to smile**
23 [indistinctly,
24 13:28] it was a little **more funny than the others**, it was a
25 little more tickling
26 and such, yes, than the others.
27 I. Exciting. So it's a little wide somehow?
28 R. Mmm .
29 I. Is it something you kind of associate with this? Is that
30 so...?
31 R. Yes, I associate it with such a thing with his hand, and
32 then there is
33 another who does such a thing on one. It's hard to actually
34 describe with sound,
35 but if you kind of have a flat hand that relaxes, and then it's
36 **someone else who**
37 **kind of runs the other hand down over it**. Almost in such a
38 massage feeling, such
39 yes... That feeling I associated it with. Does it make sense?
40 I. Yes, it makes insanely good sense.
41 R. That was the feeling. As if, **if you take a feather and run it**
42 **down over**
43 **someone else's hand**, it's the one there that springs just as
44 quietly. One is not
45 used to getting that whole hand activated that way. Yes.

	27	I. So it's a bit of an unfamiliar feeling, a bit of a new feeling, maybe?
	28	R. Yes. Yes, or not, it's not much, it's also recognizable because it has
..Vague Expressions	29	something, just that feeling that something's running down
..Human Touch	30	your whole hand, or that someone's taking one's hand and runs across.
	31	I. Exciting.
..Human Touch	32	R. Just like when you get a massage, or something like that, you often get your
..Massage	33	hands massaged in the end, so concluding, that's the feeling.
	34	I. And yes, that massage, will you associate it with something good? Or?
..Happiness Inducing	35	R. It was something good, only good, yes.
	36	I. Only good.
	37	R. Yes.
	38	I. Cool. If you were to describe it to some who do not really know what this is
	39	about, what would you say to them?
..Air	40	R. That there was someone who had such a windmill running over your hand, I
..Happiness Inducing	41	think. Such a one of those little propellers that you take with you on holidays
..Happiness Inducing	42	if you are going to a hot place, or had as a child. Such a tiny little
	43	hand-driven [indistinct, 15:40] propeller that you kind of drove over your hand.
	44	I. That sounds like a funny thing.
	45	R. Yes.
	46	I. Okay, is there anything else you think you would like to say?
..Fun	47	R. Hmm... Yeah, well, it was a lot, it was really funny, this feeling. It made one
..Happiness Inducing	48	happy, that is. It was also like such a one, it could also be a feeling I could
..Happiness Inducing	49	imagine, my boyfriend ran his hand down over my hand, or like that, ik ', it was
..Fun	50	very much like safe or fun, or like that feeling.
..Happiness Inducing	51	I. Mmm . That sounds wonderful. Okay, shall we...
