

..Air	1	R. It was a bit like getting his hand dried like that. I do not know, little
	2	associations to those where you have to stick your hands down to get your hands
..Air	3	dry when in public toilets. And it was also a bit like being, what is it called,
	4	yes, scanned, feeling? Such a little sci – fi movie , where you just get such a
..Scanning	5	" bzzzzz ", then it has just identified who you are. And then it tickled a
..Vibrations And Tickling	6	little when it came between the fingers. But it was very nice on the hand, and
..Vibrations And Tickling	7	then it got a little tickling when it started to inflate between the fingers.
..Happiness Inducing		
..Depending On Location On Han		
	8	I. Why do you think it is, well, and now you said hand dryer to start with and
	9	scanning, why are these the two things that kind of come to mind?
	10	R. I think it's because it .. The feeling started with it kind of running at a
..Continous	11	steady pace like that and rolling over the hand, or under the hand like , so
..Water	12	yeah, you got a little association with such a laser strip
..Scanning	13	running, yes, slowly forward at hand.
	14	I. Would you say that there was someone, that is, if you now say the hand dryer
	15	again. Is there any difference between that feeling from the hand dryer and then
	16	this feeling?
..Mild	17	R. It was clearly milder. Those hand dryers can be a little violent. Yes, so it
	18	was like that, a little, yes a mild, and then only on the underside of course,
	19	ik '. Yeah AI that sounds pretty crap to me, Looks like BT aint for me either.
	20	So I think that was a difference too. And then it has, yes, so it was such a bit
..Mild	21	of a soft, round feeling, wave that came like that, drove slowly, scanned the
..Water	22	hand through.
..Water		
..Continous	23	I. And this scan, so where does the scan image come from? Is it because you've
	24	seen some movies, or have you tried to get scanned like that before?
	25	R. I think it's a movie. Yes. When you see people who must, well, have scanned
	26	themselves, or I do not know, something like that, I do not

..Scanning	{	27	know, you see in
..Scanning	{	28	movies, if they have to check in through secret doors, or something like that,
..Scanning	{	29	then they either keep their hand up, and then such a green
..Novel Experience	{	30	ray runs slowly up it
		31	or the eyes or something. I think that's where it's coming from. I do not think
		32	I have seen it in reality right.
		33	I. So it is, it's like a bit of an abstract, so it's something you could imagine
		34	you felt?
		35	R. Something I could imagine, yes, exactly. So without actually having felt it.
..Scanning	{	36	But yes. It was a bit I got associations to. I think the closest I have come to
		37	it is when one is at the airport and there is such a one running downhill where
		38	they are driving down one with such one, I do not even know what it is called...
..Scanning	{	39	I. A metal detector or something?
		40	R. Yes, exactly. But I have never tried to do that by hand either. Maybe it was
		41	just a bit of that " zzz " tempo. Yes.
		42	I. Yes, okay. If you had to describe it to someone who has not tried this device
		43	, how would you look or what words would you put on it?
..Air	{	44	R. So I think I would say that this feeling, if I were to describe it, that it's
		45	a bit like getting breathed slowly, yes, breathing slowly on the hand in a
..Mild	{	46	scanning motion that runs like that, yes, there rolls over the hand and dries it.
		47	No, I do not know. Yes, but very airy. Yes.
		48	I. Very airy somehow. Exciting.
..Scanning	{	49	R. Yes, so it was fun, because since I have associations with scanning, but
		50	still not so machine-like , but more like air-drying – like , yes.
		51	I. Not machine-like , so how?
		52	R. More like that, it's not like staying, I do not know. My associations with
		53	such a laser are a little more eletro ... Electrically charged .
		54	I. So this is maybe a little more natural, I do not know?

- 53 R. Yes, a little more blow – dry like , a little more over in air  
54 than in  
radiation. Yes.
- 55 I. Cool. Is there anything else you think needs to be said  
about this stimulus?
- 56 R. Not something I can just think of, no.
